

CON-SPACE Communications

CSI-1000 Victim Locator Kit

The **CON-SPACE Victim Locator Kit** is lightweight, portable, battery powered and can be operated by a single Rescuer. Multiple Kits can be deployed simultaneously on the same site without interfering with each other. It is a completely stand alone system that gives a single Rescuer the ability to search a collapse. On location of a victim, two-way voice communication is established immediately.

Like all CON-SPACE accessories, the Rescue Probe is waterproof, Intrinsically Safe Approved and fully compatible with all existing Hardline Communication Kits. CON-SPACE Rescue Communication Kits are currently used by Technical Rescue Teams in over 500 Fire Departments throughout North America, by Industrial Rescue Teams and by Rescue Training organizations.

Equipment is light-weight, portable and extremely rugged. The Hardline Systems are Intrinsically Safe Approved and allow full duplex, hands-free communication between all users for up to 1500 feet.
