# PERSONAL PROTECTIVE EQUIPMENT

OTB have taken the effort out of selecting the best safety products for you. We have spent years testing and researching products to offer Only The Best products available in each category. Our anti vibration gloves are the best in the world. Designed to comply with stringent European and American anti vibration Standards the Decade range will beat anything else available on the Australian market. Australia lacks anti vibration Standards and so some products have come onto the market here claiming to be anti vibration gloves when in fact they would at best be described as impact resistant gloves.

We also stock the Decade Range of ergonomic products.

## WELDING PRODUCTS

### Welding Products and Welding Helmet with Respirator

Welding helmets with respirators are now common place in industry around the world. Most of these combinations have electronic (active) welding lenses/Filters and powered air purifying respirators (PAPR'S) offering optimum respiratory (Lung protection) plus eye, face and neck protection. However most leave out one very major requirement i.e. hard hat protection. Industries where welding is a daily and sometimes day long task are often medium to heavy industry, places where plant environments mandate the wearing of hard hats. Some construction sites require welders to wear a standard hard hat on site while making their way to an area to carry out welding.
